Venue: Jadavpur University, Kolkata

Welcome message:

Botanicals serve as the source of therapeutically active molecules for many years. Ashwagandha (*Withania somnifera*) is one of the most popular Indian medicinal plants, which is being used for treatment of several human ailments.

Drug discovery and development from natural products remains a challenging scientific task, which requires expertise and experience. Herbal miracle like Ashwagandha has been explored for several decades as a potential candidate for drug discovery and development.

This symposium will focus on several contemporary issues on the drug discovery & development from medicinal plants with special reference to Ashwagandha together with their quality evaluation, validation and safety related aspects.

We cordially invite you to participate in the symposium and join the array of professionals, eminent scientists and technologists to make the deliberation a great success.

School of Natural Product Studies (SNPS)

www.jaduniv.edu.in

School of Natural product Studies, Jadavpur University is dedicated to the promotion of knowledge on natural products and the dissemination of information through educational programs, research activities and sharing of experiences on the scientific validation of herbs for betterment of healthcare of the society. The school has been working on different integrated approaches for drug development from natural resources to explore the wide biodiversity of India and to emerge as a centre for excellence in the field of natural product research. The main goal of the school is to empower individuals with the skills, spirit and experience in the scientific validation of natural products in respect of its quality, efficacy and safety.

Society for Ethnopharmacology (SFE)

“Globalizing local knowledge and localizing global technologies”

www.ethnopharmacology.in

Society for Ethnopharmacology, India is a registered under the West Bengal Society Registration act and affiliated to the International Society for Ethnopharmacology. The society was formed in 2013 and has made its presence with different activities throughout the country, for development and promotion of medicinal plants and ethnopharmacology. The Society works on dissemination of knowledge in this area in different parts of India with the major highlights on *“Globalizing local knowledge and localizing global technologies.”*
